

# HOW TO BE A

# Watershed Steward

1

Do a neighborhood cleanup of trash and litter

Plant native seeds and trees! Go to your local plant nursery and ask what is native to your neighborhood

2

3

Collect rain water to use to water plants. You can use barrels and buckets to catch the water!

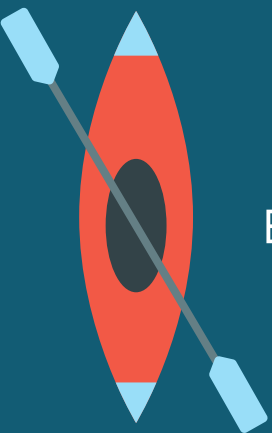

5

Conserve water! By using less water, you are saving it from being wasted. We are all a part of our watershed and share water with all the other living beings in our neighborhoods!

6

Explore your local creeks and watershed! Where does it start? Where does water go in your neighborhood?

YOU CAN MAKE A DIFFERENCE IN YOUR WATERSHED
